Dear Al:

Reference is made to your letter of July 16, 1971.

I would be glad to serve on your Wilderness Research Center, Technical Advisory Committee. I realize there may be some complications because of the distance problem. Since you indicate only one or two meetings a year are contemplated, it should be feasible to work out the trip with other business interest. I do get into Portland several times a year.

Area Director, Watson, also feels this would be a beneficial committee to serve on, so I should have the backing of the Service.

We just recently went through the Kenai Wilderness Hearings and it brought out some of the management problems that resource agencies will be facing in the future concerning wilderness management. Certainly considerable research will be necessary to prepare us for some of these coming problems.

Say, hello <sup>to</sup> Hornocker and save a chukar for me.

Sincerely,

Will Troyer  
Wilderness Coordinator
