Using restricted use pesticides

The EPA registers pesticides as either general use or restricted use. It classifies a pesticide as a Restricted Use Pesticide (RUP) if it has been determined that it could be unusually harmful to people or the environment.

Licensed or certified applicators have been trained to use RUPs properly. Only they or employees under their direct supervision may apply RUPs. Direct supervision means that the certified applicator must be within sight of, shouting distance of, or radio contact of the employee making the application. The certified applicator is also required to make contact every 2 hours. Dealers may not sell RUPs to any person who is not a certified or licensed applicator.

The EPA requires manufacturers of RUPs to include this statement, or a similar one, in a prominent place on the label, "Restricted Use Pesticide. For sale to and use only by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator's license."

All labels have a statement that says any use of the pesticide not following label instructions is illegal. Federal law allows certain exceptions as long as they are not prohibited by the label. These exceptions allow you to

1. apply a pesticide at a rate lower than that stated on the label, at a concentration lower than that stated on the label, or less frequently than stated on the label;
2. apply the pesticide to control a pest not listed on the label as long as you make the application to a crop, animal, or site listed on the label and follow all label precautions;

3. apply the pesticide in any accepted manner you wish;
4. apply the pesticide with a fertilizer; and
5. apply the pesticide as described in a experimental use permit (EUP), an exemption from the label (Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act [FIFRA]), or a special local need registration (FIFRA Section 24[c]). You must have a copy of the EUP, Section 18 exemption, or 24(c) special local need registration to do any of these.

If you make use of any of the above exceptions (either to apply or make a recommendation for pest control), you accept all liability if you get no pest control or injure your plants or animals.

Organization of this list

The pesticides are in alphabetical order by type. Each entry has the following information:

1. The tradename (copyrighted). This is the name by which most people know the pesticide.
2. The date the active ingredient was approved for registration by the EPA expressed as year, month, and day (2 digits each). For example, 830315 means the pesticide was approved in 1983 on March 15.
3. The EPA registration number. This is the number that the EPA assigns a particular pesticide when all requirements for registration have been met.
4. Manufacturer's name and address.
5. Active ingredients (the chemical name(s) of the toxin(s) in the formulation)

AMVAC Metam

Approval Date: 900611
EPA Registration Number: 5481-420
AMVAC Chemical Corp., 4100 E. Washington
Blvd., Los Angeles CA 90023
Active Ingredients:
32.7000% Sodium N-methyldithiocarbamate

CCA-Type C Wood Preservative 60% Concentration

Approval Date: 891127
EPA Registration Number: 10356-13
Chemical Specialties, Inc., One Woodlawn
Green, Charlotte NC 28217
Active Ingredients:
20.1000% Arsenic pentoxide
28.5000% Chromic acid
11.4000% Cupric oxide

Degussa Methylisothiocyanate

Approval Date: 871214
EPA Registration Number: 54289-2
Degussa Corp., 65 Challenger Rd., Ridgefield
Park NJ 07660
Active Ingredients:
97.0000% Methyl isothiocyanate

GLC 98/2 Preplant Soil Fumigant Status-11

Approval Date: 661001
TERR-O-GAS 98 Preplant Soil Fumigant
EPA Registration Number: 5785-22
Great Lakes Chem Corp., Director of Regulatory
Affairs, Box 2200, West Lafayette IN 47906
Active Ingredients:
